Subject: Orsted Comments Submitted on OCS Air Permit Revisions to Offshore Wind Project

Megan and Jessica - As you know, EPA Region 1 issued proposed revisions to the draft OCS air permit for the construction and operation of the offshore South Fork Wind (SFW) farm. I am sending as a courtesy to you the comments that Orsted submitted yesterday (December 6) to Region 1 on those proposed revisions, which included the removal of the construction emission offset requirements from the SFW air permit. On an unrelated matter, we plan to begin developing a white paper outlining other OCS air permitting issues of first impression for which national EPA guidance may be appropriate in order to resolve these other areas of permitting uncertainty and assure national consistency among the regions.

Best regards,
Stephen
